

Vocational Education and Training (VET)

At the national level, the responsibility regarding quality management is set by objectives, development, and administration tools that school owners (ie counties) and schools can use in the work of developing quality.

ARTIKKEL | SIST ENDRET: 14.09.2018

A vital part of quality assurance is the cooperation between the education providers and the enterprises.

The primary objective of the quality system in vocational education and training, is quality development.

Quality assessment system for vocational training

School owners and schools as well as the enterprises have access to tools developed for self-evaluation, recognition and peer learning.
